

Distribution Stock Planning for sage 200

Product Overview

The Distribution Stock Planning system is an additional module for Sage 200. This module is designed to manage the dynamic stock holding requirements of distribution organisation to reduce stock holdings and floor space requirements.

- **Why would you need this Module?**
 - if you need to plan your stock holding for goods within a distribution business
 - if your business is seasonal or you often add new items
 - if you receive sales forecast from your clients
 - if you would like to see a running total for stock in a daily view
 - this module provides a solution to the problem of stock planning for distribution companies. Producing a daily view of the stock level based on orders loaded and forecasts given. The system also generated dynamic stock min/max stock levels for each week/month and produces suggested purchase orders to fulfil required stock levels.
- **Fully integrated within Sage 200 & easy to use**
 - this module is operated entirely within the Sage 200 environment
 - designed for accounts and administration staff to use
- **Operational description**
 - simply load all sales orders and any forecast order into Sage SOP
 - set number of weeks of stock to hold for each stock item
 - set the number of items to a pallet for bulk purchasing functionality
 - run the planning system and review the suggested purchase orders list
 - accept suggestions and purchase orders are created automatically
 - Min/Max stock levels are dynamically adjusted for each week/month
- **Automated processes**
 - Dynamically calculated min/max stock levels for each week or month
 - Calculations based on previous 3-5 years history and growth trends
 - New stock items added are calculated from previous weeks sales to calculate new min/max levels
 - calculates when stock will run below minimum and generated suggested purchase orders to be delivered in time to meet demand
 - includes bulk purchasing options to order by the pallet load to reduce manual handling of products.
 - Allows forecast order to be entered if known. As orders are processed the forecast is removed or adjusted.
- **Reports**
 - A Sage report designer report is included to print all stock planning and suggested purchase orders
- **Runs with Multiple Sage Companies**
 - can be used on multiple Sage companies at no additional cost
- **System Requirements**
 - The distribution stock planning system runs as an additional module for Sage 200 so it has no additional system requirements.
